## P/N Series ETH100

ETH100 series data transfer slip ring, for p/n and more information please contact the technical department

### AREAS OF USE

### FEATURES

|                               |                                                                 |
|-------------------------------|-----------------------------------------------------------------|
| Structure                     | Aluminum                                                        |
| Contact type                  | Filament-based                                                  |
| Ring-side cable inlet/outlet  | Axial                                                           |
| Brush side cable inlet/outlet | Radial                                                          |
| Possible pairings             | Plug-in slip rings with power - signals - data - fluidic joints |
| Working temperature           | +10 ÷ +60 °C                                                    |
| Max voltage                   | 24 V DC                                                         |
| Max rated current in rotation | 2 A                                                             |
| Signals - Network Protocols   | Analogues - Digital - Data<br>100 Mbps/1 Gbps                   |
| Placement                     | Horizontal - Vertical                                           |
| RPM                           | max 500                                                         |
